

New on Tablet Electronic Stocktake

- A web based application to facilitate your stocktake process
- Fully integrated into Nexus ERP, bringing your stock items to your tablet or Ipad by warehouse, stock code or location
- Stock count performed and recorded on the go
- Multiple counters can work simultaneously
- Developed using SQL technology and advanced MVC web app architecture to ensure compatibility across all modern platforms and an intuitive touch based interface
- Eliminates the need for printing stocktake forms and manually entering stocktake result, thus dramatically improving operation efficiency
