

# NEXUS ERP

## the EDI Module

- Manages the exchange of electronic documents such as Purchase Orders and Sales Orders between customers and Nexus ERP
- Runs as a Windows service, able to poll multiple import sources at specified interval
- Allows Quotes, Sales Orders, Advanced Shipping Notices, Purchase Orders, Stock Receipts and Supplier Invoices to be imported
- Allows Stock information, Pricing information, Sales Order Acknowledgements, Picking Details and Invoices to be exported
- Supports Nexus XML, EDIFact, cXML, Text, Neotec file formats, and extendable to support other custom file formats
- Import process is fully audited
- Supplied with a process monitor interface to review all orders imported and invoices exported including errors
- Ability to resubmit failed imports and exports

# NEXUS ERP

## the EDI Module
